it's simple*

# MacTools®

## Simple, Easy Disk and File Repair

- New!** • **AutoCheck™** constantly monitors for potential disk crashes.
- **DiskFix®** finds and fixes over 100 floppy and hard disk problems.
- New!** • **Emergency Disk Builder** creates bootable recovery disks at installation for disaster recovery.
- New!** • **TrashBack™** transparently tracks and protects deleted files.
- **FileFix™** repairs damaged Excel and Word files.

## Powerful, Continuous Virus Protection

- **Anti-Virus** automatically finds and cleans viruses, protecting against both known and unknown viruses.
- **Virus Protection Service Plan** includes free postcard notification of new viruses, 24-hour FaxBack service, and signature postings on major BBSs (U.S. and Canada only).

## Fast, Flexible Data and Disk Backups

- **Backup** supports floppy disks, Syquest and Bernoulli cartridges, most DAT tapes, and network servers. Options include compression, password protection, and scheduling.
- New!** • **FastCopy™** quickly duplicates floppy disks and saves compressed floppy disk images to hard disks.

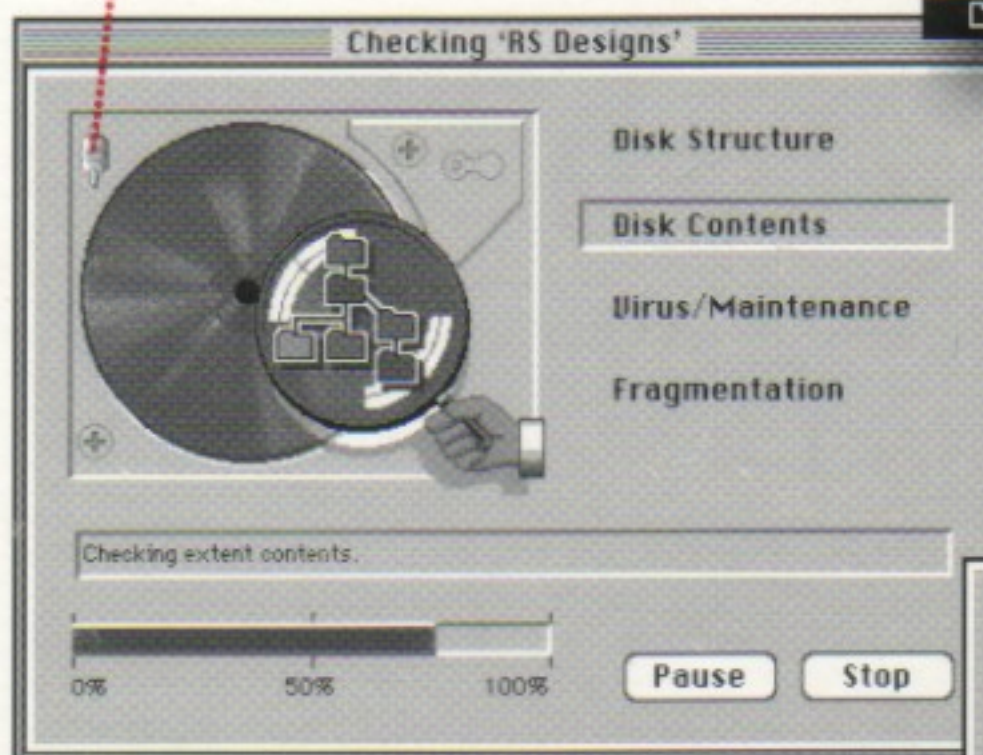

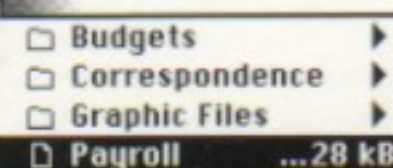

## Additional Disk Utilities

- **Optimizer** speeds data access by defragmenting and rearranging files.
- **DriveLight** clearly displays read/write floppy and hard disk activity.

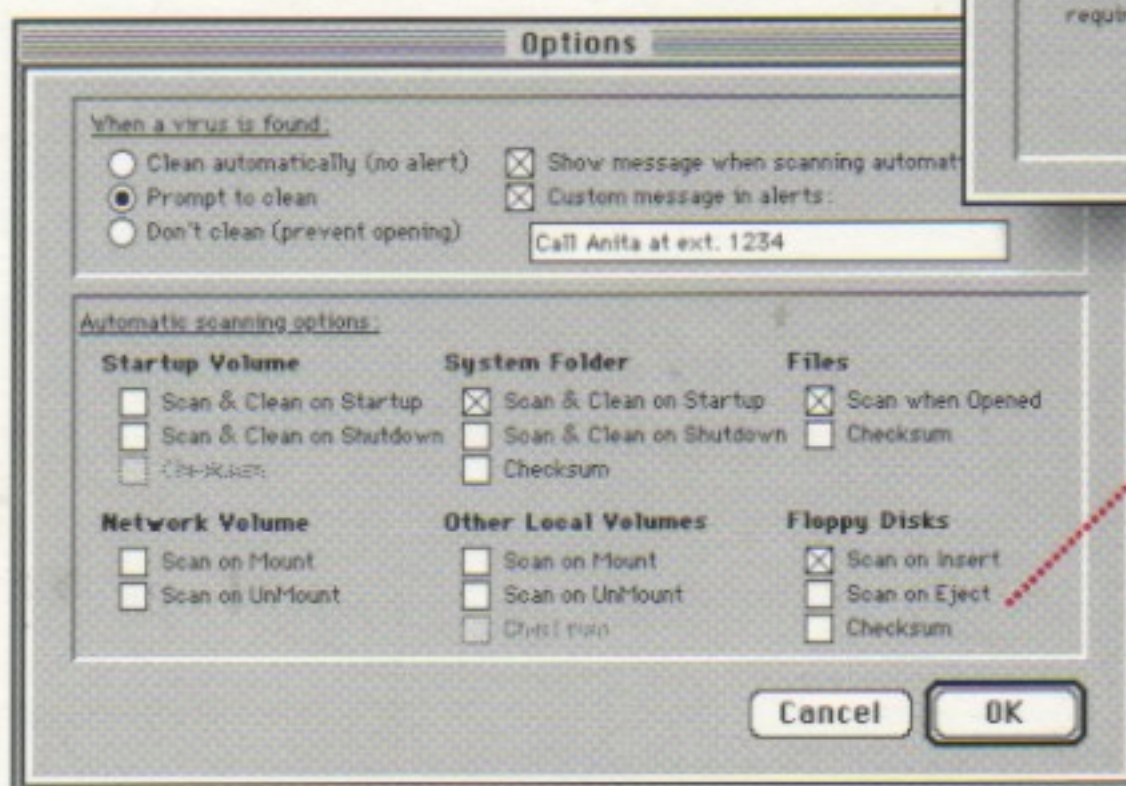

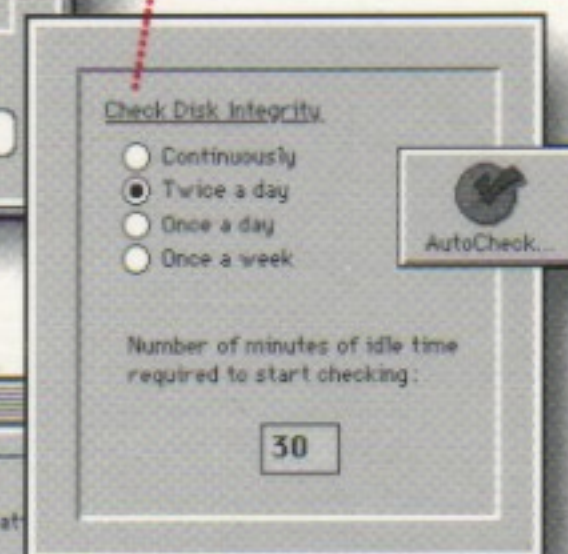

DiskFix automatically diagnoses and repairs hard drives and floppy disks. Even corrupt Desktop files can be found and fixed.

Recovering trashed files is easy. Simply pull down the Finder's Special menu, and select the file you want recovered.

AutoCheck examines hard drives in the background, and alerts you to disk problems—before they cause trouble.

Customize the full-featured Anti-Virus Control Panel to the level of protection you need. You can even scan compressed Stuffit files to ensure the complete safety of your data.

## Why MacTools?

- Want a simple way to find and fix disk problems?
- Want an instant way to recover trashed files?
- Want to protect your data from loss, theft, and disk crashes?
- Want dependable and transparent virus protection software that really works?

Then you want MacTools, the comprehensive collection of tools for disk repair, anti-virus, and backup protection!

## System Requirements

- 4 MB RAM
- Macintosh Plus or higher
- System 6.0.5 or higher (AutoCheck and TrashBack features require System 7.0 or higher)
- Includes 1.44 MB installation disks (800k disk exchange coupon also included)
- FastCopy reads and writes Apple's Disk Copy formats and reads other popular floppy formats
